

ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE REGULATORY CONTACT RECORD

Date/Time: February 14, 2002/ 11:15 a.m.

Site Contact(s): Tracey Spence
Phone: 303- 966-4322

Regulatory Contact: David Kruchek
Phone: 303-692-3328

Agency: CDPHE

Purpose of Contact: Discussion of using soil excavated for utility disconnects at B123 as backfill

Discussion

I met with David Kruchek at T124A to determine if soil excavated near the perimeter of the B123 foundation footer (approximately 30 cubic yards) is suitable for backfill at the B123 site. The soil was removed to expose and disconnect several abandoned utilities (i.e., electrical, alarm and water lines) prior to commencing removal of the foundation slab and footer.

We reviewed existing subsurface soil analytical data for samples collected near the B123 foundation. This data is summarized in the *Industrial Area Sampling and Analysis Plan Fiscal Year 2002 Addendum #IA-02-01*. Based on this review, Mr. Kruchek stated that he concurred there is sufficient data to show that the utility soil excavated near the foundation does not contain contamination and is suitable for use as backfill at the B123 site.
